

Voun Irish Florence Callejo Dejumo

Applying for Junior Full-Stack Engineer

+63 963 028 1243 | vounirishflorence.dejumo@gmail.com | Camino Dela Fe Extension, 1577
Camino Dela Fe Ext., Guadalupe Nuevo, Makati City | <https://portfolio-vif-dev-19.vercel.app>

PROFILE

Solution-focused Full-Stack Engineer and IT graduate with comprehensive technical expertise across JavaScript and TypeScript ecosystems, including Vue.js, Node.js and React Native. Highly adaptable self-starter with a track record of expanding core technical skills through structured platforms like Salesforce Trailhead development paths. Experienced in driving software projects from initial concept through final deployment hosting on Vercel and Render. Ready to apply advanced problem-solving capabilities, clear technical communication and collaborative coding practices to deliver high-impact technology solutions at Deloitte.

EDUCATION

Bachelor of Science in Information Technology (2022 - 2026)

University of Nueva Caceres

Studied and Focused on software development, database management, system design and modern web/mobile technologies.

PROJECTS

DigiStall (2025 - 2026)

Idea2Startup Capstone Project for Naga City Government

Selected as one of the Startup Founders by the Naga City Government and served as a developer of a web and mobile-based stall management system for Naga City's public markets. The system was designed to improve stall application processing, payment and transaction tracking, compliance monitoring and overall market operations. Built with Vue.js, React Native, Node.js and PostgreSQL, it provides a mobile app experience for stallholders and web-based administrative functions for administrators. It includes digital application processing, document submission and violation reporting. The system is currently in the final stages of development and is planned for deployment by the Naga City Government.

ACOTA Membership System (2023)

Academic Group Project

Developed a full-stack web application for managing tourist accommodations in the Caramoan Islands. The system allowed tourists to browse participating inns, view available accommodations and amenities and access lodging information, while providing accommodation owners with membership and property management features. Built using Vue.js for the frontend and Laravel for the backend as part of an academic software development project.

HealthWatch Olongapo (2026)

Personal Project

Designed and developed a health records management system to enhance patient data collection, storage, monitoring and appointment scheduling. The system enables healthcare providers to manage patient records, track patient status, schedule appointments and maintain health

information through a user-friendly interface. Built using TypeScript, Express.js and Supabase. The frontend was deployed on Vercel, while the backend was deployed on Render.

TECHNICAL SKILLS

Frontend Development

HTML5, CSS3, Bootstrap, JavaScript, TypeScript, React, React Native, Vue.js, Tailwind CSS, Java

Backend Development

PHP, Laravel, Java, Spring, Node.js, Express.js, Python

DevOps & Tools

MySQL, PostgreSQL, MongoDB, Supabase, Vercel, Render, Git, GitHub, Docker, VS Code, Antigravity, ExpoGo

TRAINING & CERTIFICATIONS

Salesforce Trailhead — Salesforce Development (2026)

Trailhead (Salesforce)

Completed Salesforce Development learning paths and earned Trailhead badges. **Salesforce Profile:** salesforce.com/trailblazer/waqlm0esmjj98nivog

AWS Academy — Cloud Foundations (2025)

Trained in foundational cloud computing concepts and AWS core services.

AWS Academy — Cloud Architecting (2026)

Trained in cloud architecture concepts, best practices and AWS services.

SOFT SKILLS

Clean Code Advocate | Problem Solver | Team Player | Continuous Learner

INTERESTS & HOBBIES

- Gaming & Interactive Entertainment
- Technology Exploration & Self-Learning
- Rest & Personal Wellbeing

LANGUAGES

- Filipino - Native
- Bicol - Fluent
- English - Advance (C1)
