

Voun Irish Florence Callejo Dejumo

Applying for Junior Full-Stack Engineer

+63 963 028 1243 | vounirishflorence.dejumo@gmail.com | Camino Dela Fe Extension, 1577
Camino Dela Fe Ext., Guadalupe Nuevo, Makati City | <https://portfolio-vif-dev-19.vercel.app>

PROFILE

Solution-focused Full-Stack Engineer and IT graduate with comprehensive technical expertise across JavaScript and TypeScript ecosystems, including Vue.js, Node.js and React Native. Highly adaptable self-starter with a track record of expanding core technical skills through structured platforms like Salesforce Trailhead development paths. Experienced in driving software projects from initial concept through final deployment. Ready to apply advanced problem-solving capabilities, clear technical communication and collaborative coding practices to deliver high-impact technology solutions.

EDUCATION

Bachelor of Science in Information Technology (2022 - 2026)

University of Nueva Caceres

Studied and Focused on software development, database management, system design and modern web/mobile technologies.

PROJECTS

DigiStall (2025 - 2026)

Idea2Startup Capstone Project for Naga City Government

Selected as one of the Startup Founders by the Naga City Government and served as a developer of a web and mobile-based stall management system for Naga City's public markets. The system was designed to improve stall application processing, payment and transaction tracking, compliance monitoring and overall market operations. Built with Vue.js, React Native, Node.js and PostgreSQL, it provides a mobile app experience for stallholders and web-based administrative functions for administrators. It includes digital application processing, document submission and violation reporting. The system is currently in the final stages of development and is planned for deployment by the Naga City Government.

SmartServe (2026)

Freelance Project

Developed a full-stack school cafeteria management system with separate portals for Admin/Staff and Students. Features include order management, inventory tracking, menu configuration, eco rewards, demand forecasting and a mobile-friendly student dashboard for tracking points and redeeming rewards. Built with React 18, Vite, Tailwind CSS, Node.js, Express and MongoDB. Implements JWT authentication, QR code student identification, real-time notifications and a four-phase security architecture. Deployed on Vercel.

HealthWatch Olongapo (2026)

Freelance Project

Designed and developed a full-stack healthcare management system for Olongapo City that enables clinical staff to manage patient records, record consultations with ICD-coded diagnoses, schedule appointments, issue prescriptions and monitor vital signs across barangay health stations. Features a real-time analytics dashboard with disease trend analysis and outbreak detection, CSV report generation, JWT authentication with token rotation, role-based access control, audit trail logging and a responsive mobile-friendly UI. Built with React 18, TypeScript, Tailwind CSS, Vite, Express.js 5, Prisma ORM and PostgreSQL. The frontend was deployed on Vercel, while the backend was deployed on Render.

Collaborative Document Editor (2026)

Personal Project

Designed and developed a Google Docs-inspired collaborative document editor with rich-text editing powered by Tiptap and ProseMirror, debounced autosave with visual save indicators and Markdown/text file import with XSS-safe sanitization. Implements role-based access control distinguishing Owner and Collaborator roles, with document sharing, permission revocation and cascading deletes in PostgreSQL. Architected using the Hexagonal Ports and Adapters pattern with dependency injection and Zod schema validation. Built with React 18, TypeScript, Vite, Tailwind CSS, Express, Prisma ORM and Supabase PostgreSQL. The frontend was deployed on Vercel, while the backend was deployed on Render.

TECHNICAL SKILLS

Frontend Development

HTML5, CSS3, Bootstrap, JavaScript, TypeScript, React, React Native, Vue.js, Tailwind CSS, Java

Backend Development

PHP, Laravel, Java, Spring, Node.js, Express.js, Python

DevOps & Tools

MySQL, PostgreSQL, MongoDB, Supabase, Vercel, Render, Git, GitHub, Docker, VS Code, Antigravity, ExpoGo

TRAINING & CERTIFICATIONS

Salesforce Trailhead — Salesforce Development (2026)

Trailhead (Salesforce)

Completed Salesforce Development learning paths and earned Trailhead badges. **Salesforce Profile:** salesforce.com/trailblazer/waqlm0esmij98nivog

AWS Academy — Cloud Foundations (2025)

Trained in foundational cloud computing concepts and AWS core services.

AWS Academy — Cloud Architecting (2026)

Trained in cloud architecture concepts, best practices and AWS services.

SOFT SKILLS

Clean Code Advocate | Problem Solver | Team Player | Continuous Learner

INTERESTS & HOBBIES

- Gaming & Interactive Entertainment
- Technology Exploration & Self-Learning
- Rest & Personal Wellbeing

LANGUAGES

- Filipino - Native
- Bicol - Fluent
- English - Advance (C1)
